

Piotr Krawczyk

Full-stack software developer

I am a father of 2 boys (soon to be 3), transitioning from hospitality management to web development career. I recently graduated from Le Wagon 24 weeks part-time bootcamp, which I balanced with a full-time job and parenting. During the course, I developed from scratch two web products together with my team. Having spent 12 years in the hospitality sector, I am looking to bring my operations management, problem-solving, and innovation skills to an ambitious tech team. Interesting fact, I am Times magazine Person of the Year 2006.
